“When it comes to children’s supplements, I recommend Usanimals™, USANA’s chewable ‘Essentials’ for kids. This product provides the advanced levels of the essential vitamins, minerals, and antioxidants that all children need for a healthy start in life. Lyle MacWilliam’s detailed comparison of over 160 children’s nutritionals, gives Usanimals the highest rating for formula completeness, balance, potency, and safety. The antioxidant complex in Usanimals is particularly strong (see vitamin C, vitamin E, selenium, and phytonutrient complex information above). And importantly, I love the fact that by using ingredients like honey, xylitol, and berry powders, USANA provides a children’s supplement that is free of artificial sweeteners, colors, and flavors.”**
