

ENERGY CRISIS: USANA HEALTH SCIENCES' FEARLESS LEADER AND THE BIRTH OF REV3 ENERGY™

Dave Wentz is a CEO on the go. From jumping out of planes **for fun** to jetting across international waters **for business**, Dave is geared for life in drive.

And somewhere in this constant motion Dave realized that all the energy drinks keeping him at full speed were not very good for him. They provided little nutrition, contained too much sugar, and caused a crash-and-burn effect.

He wanted a healthy alternative, something more natural that could give him the same lift. Dave believes that active people, who consider their health a priority, deserve a better choice.

Being the CEO of an established health sciences company has its benefits—one being the ability to come up with an innovative **solution to this energy crisis**. So Dave got to work with USANA's cellular nutrition experts and formulated a new, revolutionary product:

Rev3 Energy. It's a cleaner, smarter, stronger energy to keep active, high-endurance people on the move in a healthier way.

THE **REV**OLUTION BEGINS...

THE REVELATION: AN ENERGY EPIPHANY

Energy drinks are changing. People are more health conscious and want a natural, revitalizing energy—without the crash-and-burn. They want an alternative to harmful chemicals, artificial additives, and high calories. They want a **good-for-you energy** rather than a quick fix.

THE REVOLUTION: CLEANER. SMARTER. STRONGER.

Rev3 Energy™ is all the power of an energy drink—refined. That's because Rev3 Energy is an advanced formula of antioxidants, important nutrients, and natural caffeine derived from a blend of teas—all packed into a sweet, tasty beverage.

Rev3 Energy comes in two unique formulas with two delivery systems: Rev3 Energy and Rev3 Energy Surge Pack.

REV3 ENERGY™:

REV3 ENERGY™: THE SCIENCE

L-carnitine offers two important functions in energy production:

1. Shuttles fatty acids into the mitochondria where they can be turned into energy
2. Helps to transport toxic byproduct of energy combustion out of the mitochondria to prevent accumulation

Rev3 Energy contains 375 mg per can of L-carnitine—a significant amount of this valuable ingredient that is unparalleled among competing energy products. Rev3 has more L-carnitine than Red Bull, Verve, and Rockstar—combined. See our product ingredient comparison in the included DVD.

Low-glycemic formula for sustained energy

- The total glycemic load from Rev3 is three to four times lower than traditional energy drinks.
- Typical energy drinks spike your blood sugar levels for a quick burst of energy, but lead to a crash soon after that leaves you feeling drained.
- Rev3 does not produce a sugar crash because of its low-glycemic formula.

CLEANER — Crisp, light pomegranate taste

- No artificial flavors
- No artificial sweeteners
- No artificial preservatives
- No artificial colors

SMARTER — Smart source of nutrients

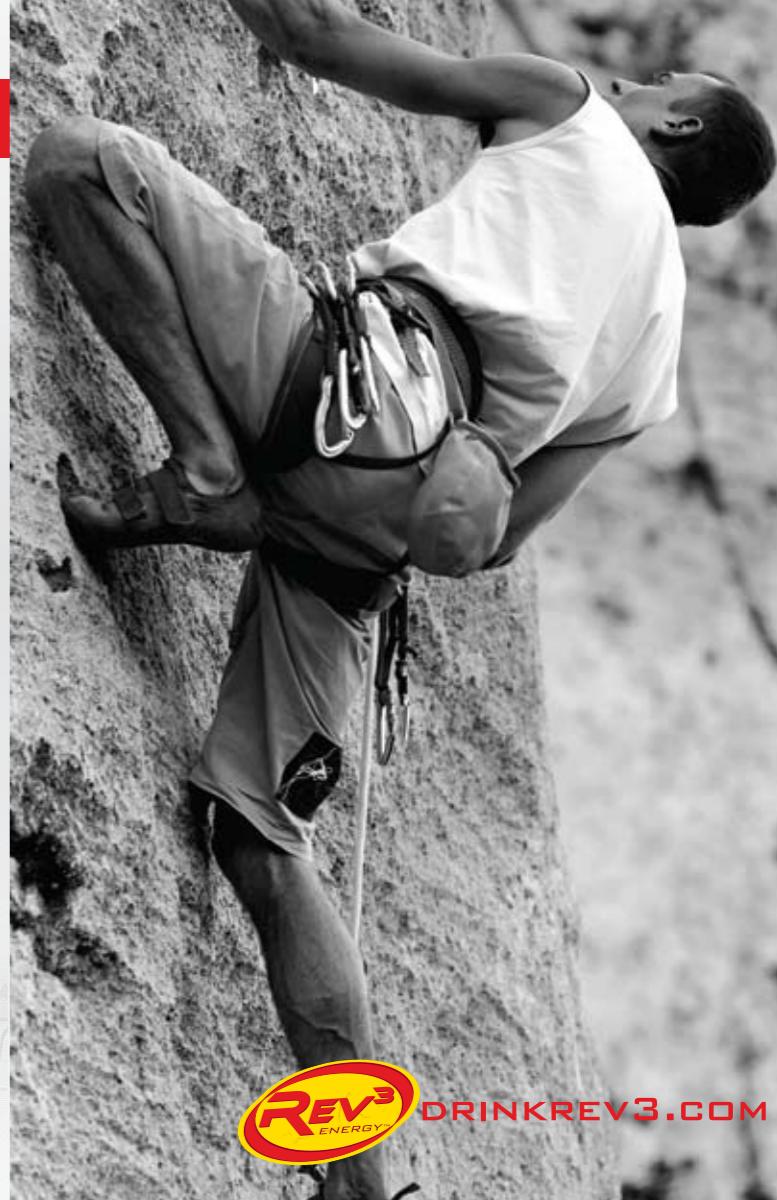

- Contains natural caffeine from a blend of teas to improve mental alertness and stamina
- Supplies numerous beneficial ingredients, including potent antioxidants
- Uses low-glycemic sugars for sustained energy
- Provides vitamins, minerals, and antioxidants to support energy metabolism at the cellular level

STRONGER — Powerful, energy-producing ingredients

- Uses more than just sugar and caffeine
- Contains a complete and proprietary Energy Complex with L-carnitine, tea, ginseng, Rhodiola, cacao, ribose, citrate, malate, and coenzyme Q10
