Small retail outlets that enroll as Associates may display and sell Rev3 Energy on the shelves of their establishment(s). A small retail outlet is generally a singly owned outlet as opposed to a large chain store. In no case can an Associate display or sell Rev3 in more than three (3) individual outlets. Approved retail-oriented establishments include but are not limited to small convenience stores, service stations, restaurants, or cafés. Unapproved retail-oriented establishments may include but are not limited to large retail stores and Internet auction sites. Associates who choose to sell Rev3 at a small retail outlet must adhere to the following guidelines:

- As with service-oriented establishments, only those retail establishments that enroll as Associates may display and retail Rev3 on their shelves. All other terms of the Associate Agreement and Policies and Procedures remain unchanged.
- In order to encourage retail customers to reorder Rev3 on Auto Order as a Preferred Customer or Associate, those Associates who choose to sell Rev3 in retail establishments under this program should do so at a price no lower than the suggested retail price for the product.
- This program does not extend to other USANA products.

To retail Rev3 under this program, you must submit this completed form to USANA's Ethics and Education team at ethics@usanainc.com or fax it to (801) 954-7809. Note that the form must include the retail establishment where Rev3 will be sold.
